Paddock			Pferdekoppel
Wheelbarrow		Brouette	Schubkarre
Pitchfork		Fourche	Mistgabel
Manure			Mist
Muzzle		Muselière	Maulkorb
Collar			Halsband
Patio			Außenbereich (Pool)
to ruminate			wiederkäuen

Morning chore / 8:00 o'clock

Get the animals something to eat and drink, get rid of their poop and get things ready for the day. If you do it in a certain order you will save time, energy and loops to run.

1. Get the dogs out of the barn and close the door to outside.
2. Food-booth: Please close all lids firmly after opening.
 - a. Prepare food for Rockfi, the black one-eyed horse: Black pan, watered dried food you prepared the evening before, add 1 spoon probiotics (white box to the left), add half a cup of malt-syrup and mix it. Bring it out to the horse-booth and put it on the floor. Rockfi will be happy to find it there when we bring him in.

- b. Prepare grains for the Does and Kids: $\frac{2}{3}$ of the silver bucket. Put it in the 3 painted feeder next to the fence at the meadow next to the barn.
3. Let the goats out: Open the barn doors. They will be very happy to find the grains outside and the barn is empty and can be cleaned from poop later on. The bucks don't get grain, they stay in a different area anyway; the kids who freshly don't drink milk from their mother also should not get grain, they should stay inside until you cleaned the barn.
4. Get Rockfi in: he is at the meadow with the other horses. Put on his head collar and the leash and guide him into the barn to his food pan you prepared in 1a. Walk on his left side so he can see you with his (only) eye there. He will need some time to eat, so you can continue doing the chore.
5. Tidy the barn hall, sweep the floor.
6. Clean the goats/bucks sections of the barn (inside) from poop, collect it with the wheel-bar, put hay in the feeders - outside for the does and kids, inside for the bucks, refill their water buckets. The manure goes with the wheelbarrow to the goat's manure place.
7. Refill the dog's feeder in the barn (there are 2) and feed the cat in the tools-booth. Food for them is in the food-booth.
8. The barn door can be opened now so the dogs can get in. Jack should go into the dog's booth during the day when visitors are at the farm (Wednesday-Sunday). Remove his collar and recharge it later in the house. Put up the "don't enter" sign/chain across the open barn's door.
9. Get Rockfi back to the meadow and put the muzzle on the small black horse.
10. Alpacas: Shein has refilled the hay feeder in the morning, refill the water buckets and remove the poop. It's most likely on specific locations at their meadow. The manure goes with the with the wheelbarrow to the Alpaca's manure place.
11. Refill the pink disinfectant in the feet-mat-container at the entrance of the farm on days with visitors (Wednesday-Sunday).
12. Close the doors of the quonset on days with visitors (Wednesday-Sunday).

14:00 o'clock

Remove the muzzle from the little black horse. Check water of goats and Alpacas.

Evening chore / 18:30 o'clock

1. Goats: Refill feeders inside the barn and refill water. Bring the goats from outside in the barn and close the barn doors to the meadow.
2. Conan, the dog gets his food inside the barn (goats area)
3. Water for the hens/ducks, collect eggs
4. Alpacas: Refill water.
